

ARM SERIES HEAT TRANSFER APPLICATION MACHINES

Altena Machine Builders, Inc. has developed a line of heat transfer application machines for rolled label products. These "ARM Series" machines were designed and are manufactured by Altena Machine Builders, Inc. specifically for application of heat release transfer labels. These machines provide our customers with a consistent and precise label applications time after time. Machine controls are user friendly, easily adjusted and relatively maintenance free. The pneumatic system, with independent air regulators and flow control allow precise label application pressures. The sensor slide system adjusts for use with almost all brands of transfer labels. The teachable single over/under sensor simplifies photo-mark identification and allows precise label location. The machine, equipped with our exclusive tension system, large diameter rollers and tape guide collars prevent transfer tape drifting, stretching, tearing and premature label separation. Change-over time for differing label sizes is accomplished in minutes. Required machine adjustments are simple. Maintenance is minimal with all vital areas completely accessible for your technician. Air requirement: 60psi. Power requirement: 110 volts: 6.2 amps. 220 volts: 4 amps.

Find out how easy it is to improve label application quality while increasing production using our exciting line of quality ARM Series heat transfer label application machinery. Requests for custom machine applications will always be welcome.

Introducing Our New —→ **ARM 20 SERIES**

User Friendly Controls

Teachable Over/Under Tape Sensor

Tape Sensor Slide System (Fully Adjustable)

Large Diameter Roller System (Bearing Mounted Rollers)

Two-Hand Control Switches

PLC Logic Control System

Heating Block size (2.5" x 3")

Presser Heads - Interchangeable (Shaped dies)

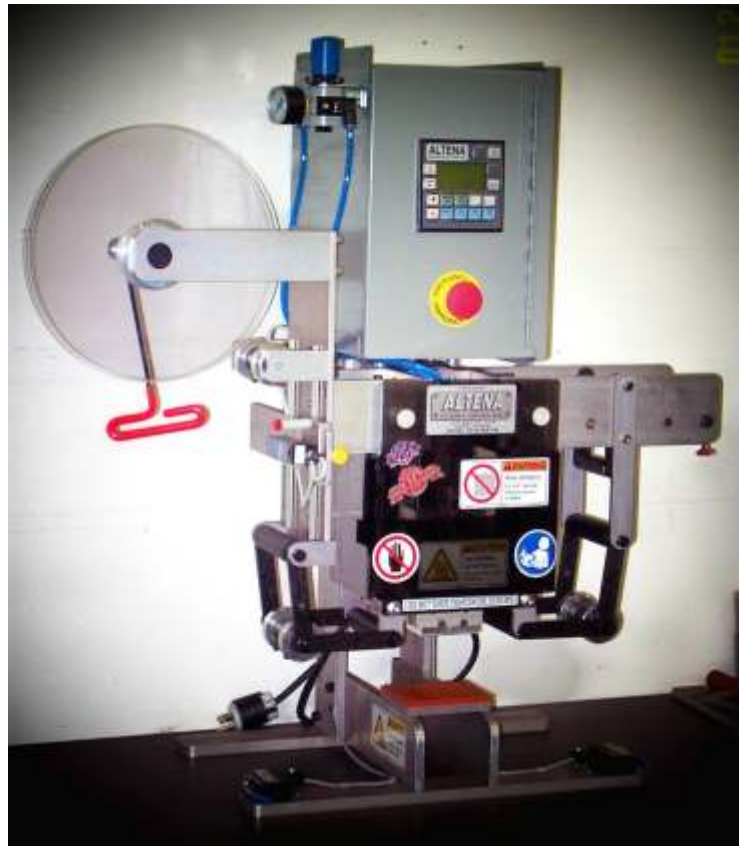

Fixed Lower Anvil Plate (With Silicon Rubber Pad)

Independent Air Regulators for Precise Label Application Pressures

DC Gear Motor Drive

DC Gear Motor Drive

110 or 220 volt
available

Options:

Laser Cross Generator and Additional Presser Heads

Visit www.altenamachines.com to view videos of this unit and our other lines of quality machinery.

Other Exciting Transfer Equipment Options

Automated Rotary Application Units - Side X Side Application Units - Multi-Head Units - Die Cut Application Custom Units
