

ADCM PIVOT PRESS HEAT TRANSFER MACHINE

Our exclusive ADCM PIVOT Series Machines is designed for extended production use and has user friendly options. This new Pivot Press is engineered to our high production requirements our customers have come to expect!

Our Self leveling Heat block insures accurate and precise pressure application on the entire transfer surface.

The lower anvil system is designed with an interchangeable anvil system to control the application and reduce the HEAT MARK! Anvils can be shaped to match the transfer being applied as well as round, square and odd shapes!

Altena Machine Builders, Inc. Is expanding our line of heat transfer application machines for individual as well as rolled label products. All our machines provide our customers with a consistent and precise label applications time after time. Machine controls are user friendly, easily adjusted and relatively maintenance free.

The pneumatic system, with independent air regulators and flow control allow precise label application pressures. Required machine adjustments are simple. Maintenance is minimal with all vital areas completely accessible for your technician.

Air requirement: 60psi. Power requirement: 110 volts: 12.5 amps/1375 watts. 220 volts: 6.8 amps/1500 watts.

Find out how easy it is to improve label application quality while increasing production using our exciting line of quality ADCM Series heat transfer label application machinery. Requests for custom modifications are always be welcome.

User Friendly Controls on a Single Screen
(Password Protected to eliminate poor applications)

Heating Block size
(6" X 6")

Large 2" working height for ease of loading garments

Control buttons are user friendly and ergonomically designed for operator use

Pivot Arm is separated from controls to minimize possible control failures

Lower Anvils - Interchangeable
(Shaped to match transfers)

Independent Air Regulators for Precise Label Application Pressures

110 or 220 volt available

Options: Shaped anvils
