

# ALTENA HEAT TRANSFER MACHINES

Altena Machine Builders, Inc. has developed a line of heat transfer application machines for Die Cut label products. These "machines were designed and are manufactured by Altena Machine Builders, Inc. Specifically for application of die cut heat release transfer labels. These machines provide our customers with a consistent and precise label applications time after time. Machine controls are user friendly, easily adjusted and relatively maintenance free. The pneumatic system, with independent air regulators and flow control allow precise label application pressures. The anvil assembly slide system is finely balanced ease of motion with minimal effort and is almost maintenance free.

These "T-Shirt" models are designed to provide longer application times while allowing continuous production output. The operator can load garment onto the anvil assembly then slide the anvil forward and under the heat block for application. Machine maintenance is minimal with all vital areas completely accessible for your technician. Air requirement: 60psi. Power requirement: Actual usage will be determined by heat block size, number and wattage of Heater Cartridges.

Find out how easy it is to provide quality label applications while increasing production using our exciting line of quality Altena Heat Transfer Label Application Machinery. Requests for custom modifications will always be welcome.

## ***T-Shirt (Sliding) Die Cut Application Machine***

### **User Friendly Controls**

**Bearing Mounted  
Anvil Table Slide System**  
(with silicon application pad)

**Two-Hand  
Control Switches**

**PLC Logic Control System**

**Heating Block size  
(Dependant on Application)**

**Radiused Heat Block**

**Laser Cross Hair**  
(For accurate positioning)

**Independent Air Regulators  
for Precise  
Label Application Pressures**

220 volt

*A Better  
Heat Transfer  
Application  
Machine*
